

DCT1800

Digital Consumer Terminal

The Motorola DCT1800 offers an affordable interactive digital set-top solution for operators who want a smart, economical means of offering interactive services such as Video-on-Demand (VOD), impulse Pay-Per-View (PPV), and Electronic Program Guides (EPGs). Based on the Motorola DCT2500, the Motorola DCT1800 offers the full application functionality of its predecessor, and includes Motorola's Emmy-award-winning access control and encryption technology DigiCipher® II.

Motorola's DCT1800 incorporates a streamlined design that features fewer I/O ports and works entirely via remote control instead of using front panel control. Perfect when used as an additional cable outlet within the household or simply as a low-cost offering to provide digital interactive services to your customer base.

The Motorola DCT1800 set-top provides full interactivity at a low cost.

HIGHLIGHTS:

- ITU standard 64/256 QAM/FEC enhanced adaptive equalizer
- On-board, real-time RF return (256 Kbps)
- Bitmapped graphics display (4-8 bit)
